

S6 中六課程 1 月 WEEK 1 RECAP	
Paper 1 Reading	<ol style="list-style-type: none"><li>1) 學習分析題目類型 (只有8大類別)</li><li>2) Skimming的精髓，並非「貪快」，請盡量跟從我們 Lecture 時閱讀段落大綱的流程</li><li>3) 要確實記得了解段落大綱，並不代表你需要明白每一隻字</li></ol>
Paper 2 Writing	<ol style="list-style-type: none"><li>1) 先學懂正確運用百搭公式</li><li>2) 句子架構(SP)方面，請立即重溫、學習以往所教過的SP</li><li>3) 邏輯思維較弱的同學，必須立即嘗試運用 Framework</li></ol>
Paper 4 Speaking	<ol style="list-style-type: none"><li>1) 立即背熟公式</li><li>2) 請多做假想敵練習，令你可以靈活地變換用詞及用字</li></ol>

## Appendix

### 1. Basic Sentence Patterns Recap

**NOBA: Not only but also**

I genuinely believe that this policy will not only \_\_\_\_\_ but it will also \_\_\_\_\_

**Inversion: Hardly....**

Hardly would we be able to find another better policy - I strongly support this change.

## 2. Writing Framework (Multiple SP Framework)

### **Question 1: Are food warning labels useful in changing people's behaviors?**

Firstly, labels can change people's behaviors because the labels could inform people not to consume unhealthy items. As labels can warn people off by explaining how unhealthy certain food items are, consumers will be able to make better decisions for their own health and benefits. Such labels will not only be able to notify consumers the drawbacks of the items, but these labels will also be able to remind them the negative impacts - for instance, a person with high blood pressure will think twice before buying a fatty product from the shelf. Hardly \_\_\_\_\_, right? There is unanimous consensus that labels and warning signs can indeed alter buyers' behaviors right before their purchase. For the proof of this, look no further than \_\_\_\_\_. It is blatantly obvious that this solution would work....

### **Question 2: Should we announce students' exam results and rankings publicly?**

Firstly, a solid reason to say "no" to the public announcement of students' rankings would be that it would invade their privacy. [Elaboration: 2-3 lines of Simple English.] Showing students' exam results to the entire school will not only \_\_\_\_\_ but this will also \_\_\_\_\_. There is unanimous consensus that \_\_\_\_\_ - therefore, if we do this, it will certainly create a negative effect among the student body. Hardly is there a worse policy. For proof of this, we need to look no further than \_\_\_\_\_. In a nutshell, this is a terrible policy that we must not support.

Functional Expression

### 3. Speaking agreement (when you're pointing out your examples)

#### Version 1

You've made a valid point and I have actually seen [many examples backing that up too / many examples that support your theory / many examples that support your point]

#### Version 2

I'm sure you guys have seen [ this show] before as well, right? In this show, it is said that \_\_\_\_\_.  
So, yes, I do think you have made a brilliant point.
